NEXT FALL, when your friends ask you what you did during the summer, you can say…

I worked with animals. I directed my own film. I made an edible chocolate flower.

I discovered a new career. I explored a new major. I learned how to forecast the weather.

I learned how to feed the world. I sponsored a legislative bill. I found new friends.

These are just a few of the options available to you at the 2016 BIG RED ACADEMIC CAMPS to be held this June. These career exploration camps are a chance for you to explore the UNL campus, meet people from across the country, spend time investigating an interest or potential career and have lots of fun.

2016 BIG RED ACADEMIC CAMPS will be hosted by Nebraska 4-H and UNL faculty members in various academic areas across campus. After spending several fun-filled days exploring a specific topic like filmmaking or veterinary science, we’ll invite your family to join you for a special “capstone event” where you can showcase your work.

The 4-H Youth Development program stands with the non-discrimination policies of the University of Nebraska–Lincoln and the United States Department of Agriculture. UNL does not discriminate based on race, ethnicity, color, national origin, sex, religion, disability, age, sexual orientation, gender identity, genetic information, race, color, marital status, and/or political affiliation in its programs, activities, or employment. For nondiscrimination inquiries, contact the Director of IEC/Title IX Coordinator or the Section 504/ADA Coordinator at 128 Canfield Admin. Bld., Lincoln, NE 68588, (402) 472-3417, or the Office for Civil Rights.
Discover VETERINARY SCIENCE

Explore various aspects of veterinary medicine and discover what veterinarians need to know to help sick animals. Learn about anatomy, bacteriology, parasitology, and surgery. Learn how to give an animal a physical examination. Learn from scientists and veterinarians studying how animal diseases are diagnosed, treated and prevented. Learn about an exciting career as a veterinarian. Taught by the University of Nebraska–Lincoln, School of Veterinary Medicine and Biomedical Sciences.

Related Careers: Veterinary Medicine, Veterinary Technology, Pharmaceutical Sales and Development, Government Services

TUITION FEES
Early Bird $600
Regular $650
Late $700

 Discover WEATHER & CLIMATE SCIENCE

Come and find out how scientists observe and forecast the weather as well as monitor the changing climate. During the week, participants will use instruments to make their own weather observations; learn how to forecast the weather; visit with National Weather Service forecasters; learn about the local weather and climate of Nebraska; from tornadoes to blizzards; meet Emergency Management experts; meet the coordinator of the Storm Spotter Network; learn about storm preparedness; and, using our UNL TV weather studio, each camper will create a video of their weathercaster experience in front of the green screen. We will also conduct important hands-on activities about renewable energy and climate change. Taught by the Department of Computer Science and Engineering.

Related Careers: Environmental Science, Environmental Science, Environmental Science, Environmental Science, Environmental Science
